LY VAN LOI

EXPERIENCE

Project coordinator

Investigate biodiversity and recommending solution for sustainable management at Lung Ngoc Hoang Wetland Conservation 2016-2017

Youth network building for sustainable development of the Mekong Delta 2015-2016

Unlimited of youth collaboration for developing sustainably the Mekong River 2015-2016

Flood Retention Livelihood Demonstration Design Study 2015-2016

Manage the progress of the project, make sure all activities are implemented in the right way. To do that, I need to know all human resources capacity and stay in touch closely with them. Besides, I also write the report for all activity and whole project.

Project assistant

Building the community – based network of salinity intrusion monitoring 2015-2016

Manage the system of monitoring salinity intrusion in the Mekong Delta. Contact farmer around the coastal area in order to ask them send the data of salinity concentration every day and then do data analysis and send the report back to local authority to support making decision for salinity intrusion resilience.

College of Environmental & Natural Resources Management

08/2012 – present

Researcher and Project associate

Cantho city, Vietnam

Lead student groups to the field to conduct interviews and collect data; conduct Participation Rapid Appraisal Seminars and project presentations; and create biodiversity maps of the Mekong Delta area. Investigating and suggesting to protect national part, endangered species.

Mekong Delta Youth Network

05/2013 – present

Leader

Cantho city, Vietnam

Building the network which called “Young Scientist Network” – educating young people to be environmentalist in three main topic of water governance, biodiversity and climate change. Connect youth in the Mekong Delta by organizing workshops, trainings, and cultural knowledge exchanges to improve the capacities of the Mekong Delta’s Youth. Identify projects and mobilize the young generation to become involved. Arrange meetings between foreigners and students to exchange knowledge. MDY is partnership with Oxfam Australia. Fanpage “*Thanh Niên Đồng Bằng Sông Cửu Long*”. Website: <http://mdy.vn>, activity video [here](#)

Charity Programs*12/2013 – present***Tour guide****Mekong Delta, Vietnam**

Guide foreigner travelers around the Mekong Delta and bridge between them and the villagers.

Reduce – Reuse – Recycle (3R)*01/2005 – 01/2006***Co-founder****Cantho city, Vietnam**

I bought second-hand products from students at Cantho University and created new products from them. I also managed the club's membership to exchange experiences between different universities.

AWARDS**JWH Initiative - Both ENDS** *“Supporting young environmental leaders”**2013*

In recognition of my commitment to leading youth in my community to protect the environment

EDUCATION**MA Environmental Management, Cantho University, Cantho city, Vietnam***08/2012 -**present*

I gained deep knowledge about how to manage the environment, sustainable development and social impacts from development projects. My research was on “The impact of changing land-use on the biodiversity of fresh water fish in Cantho city”.

EarthRights International – Mekong School, Chiang Mai, Thailand*06/2014 – present*

This course brought six countries' youth together into a network of solidarity. I learned many problems related to development projects in the Mekong region. I learned directly about case studies through field visits. I also undertook two months of field work focusing on “Environmental and Social impacts from the deep sea port project in the Mekong Delta”.

SCIENCE EVENT**Greater Mekong Forum***2016*

This forum was held in Bangkok, Thailand with the purpose of sharing all the issue in the Mekong Region. I have an opportunity to present the issue of water governance and climate change in the Mekong Delta

Water Governance Training*2015*

Oxfam has organized this training in Phnom Penh, Cambodia. During the training, all knowledge of water governance and the issue in the Mekong River basin like hydropower dams, water diversion, etc were provided as well as some tool for assessing the impact of development project in the region.

LANGUAGES**Vietnamese** – Native language**English** – good at four skills (speaking, listening, writing and reading)

SKILLS

IT

Microsoft office (Word, Excel and Powerpoint)

GIS software (ArcGIS, MapInfo, MicroStation, FME, WebGIS,...)

Adobe software (Photoshop, Premier,...)

Autocad

Internet

Communication

Talking with strangers are not difficult to me. I have a lot of experiences of inspiring people, let them pay attention on my conversation. Besides, I am also good at presentation. By using IT skills, I make my presentation look very attractive and creative.
