3rd Progress of Joint Research Activities

Research No.:** E-10 ODA Loan Joint Research				Date:16/Oct/2020	
1	General Title	To study the socio-economic feasibility of the climate change and environment-related solutions			
2	Core	CTU: Vo Thanh Danh (Program Leader), Huynh Viet Khai, Nguyen Tuan Kiet, Phan Dinh Khoi, Tong Yen Dan and Ngo Thi Thanh Truc (secretary)			
Z	Members	Japanese Universities: Mitsuyasu YABE (Kyushu University); Yuzuru UTSUNOMIYA (Nagasaki University)			
3	Duration	November 2018 – September 2021 (Batch-2)			
4	Main Objectives	Study on the socio-economic feasibility of the proposed/potential options and solutions in the context of extreme weather events and environmental degradation			
5	 Focal Points Assessing socio-economic feasibility of agricultural models under climate change in the Meke Delta Assessing the feasibility study of the proposed farming systems in the context of extreme weather events and environmental degradation in the Mekong Delta Assessing the feasibility study of pollution options from air, water, soil and waste manageme Assessing the feasibility study of installing biogas from husbandry waste with supplement of agricultural or household biomass in the Mekong Delta Feasibility study of installing biogas from husbandry waste with supplement of agricultural or household biomass in the Mekong Delta
